## DETAILED ACTION

### *Election/Restrictions*

1. This application was filed under 35 U.S.C. 171. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species listed below do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: In the instant case, there is no common "special technical feature" because the inventive concept in claims, such as claim 1, does not define over the teachings of the prior art set forth, for example, in Nishimura et al. (U.S. 4,451,428).

The species are as follows:

- A. The embodiment as shown in Fig. 2a.
- B. The embodiment as shown in Fig. 2b.
- C. The embodiment as shown in Fig. 2c.
- D. The embodiment as shown in Fig. 2d.

2. Upon election of one of the embodiments identified above as A-D, applicant is further required under 35 U.S.C. 121 to elect one of the following disclosed species to

Art Unit: 3641

which the claims shall be restricted if no generic claim is finally held to be allowable

(e.g. see claims 11 and 12). Currently, claim 1 appears to be generic.

E: Wherein the absorber material consists of boron.

F: Wherein the absorber material consists of hafnium.

G: Wherein the absorber material consists of boron and hafnium.

H: Wherein the absorber material consists of boron carbide.

I: Wherein the absorber material consists of hafnium metal.

J: Wherein the absorber material consists of boron carbide and hafnium metal.

3. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

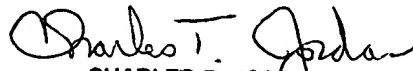

**Conclusion**

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rick Palabrica whose telephone number is 703-306-5756. The examiner can normally be reached on 8:00-4:30, Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Carone can be reached on 703-306-4198. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-7687 for regular communications and 703-305-7687 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1113.
